Our client Makes a multiple child car seat - the only one in the world!

Children have to sit in car seats until they are 12 years old/135cm/36kg You cannot fit 3 child seats side by side in most medium sized (even large) cars. When baby number 3 arrives, most families are forced into buying a 7 seater vehicle which often they often can't afford or simply don't want. The Multimac is a complete unit which sits on top of the back seat of the car, enabling either 3 or 4 children to sit safely in either a rear facing baby cradle, or forward facing in a 5 point harness up to the age of 12 years. The Multimac has been rigorously crash tested and its solid design and energy absorbing features makes it incredibly safe.

A family run company, made in the Midlands and selling worldwide.
