## Notes - e.g. Rationale for lend, what benefit will it provide, new contracts, any further info

Danny runs a mechanical and electrical contracting service, he offers services such a fibre instillation, smoke alarm instillation, and all electrical requirements. The business has been trading since 2020 and in their last financial year the business turned over £1.9million where he took £93k as profit.

He requires the funds to help with a large project he is currently working on which is near completion, he needs to purchase some materials and equipment to complete the job which will hopefully be finished in the coming months. His plan is to use the money to help finish the project early where he can then pay the loan off early also.

Danny is currently a tenant with some previous issues on his credit which he has now cleared and is building his credit back up.
