NOTES

Company:

A well reputed Film Production Company based in the UK with global presence all across the Film and Media spectrum. USP till now has been on ground production from the scripting to the delivering of the film to the Post Production.

Lending Need:

In 2024 plan to expand operations to Post-Production and Distribution of the films that they will make themselves as well as by other reputed companies and filmmakers. This will give them more control over the final output and profits vis-à-vis Revenue.

Post-Production will involve Editing, VFX, DI and Animation setups and the funds would be utilised to buy Equipment to support the films in line with the current technologies.

The Distribution will help release our films theatrically all over the United Kingdom. So once they have funds they will be marching swiftly towards becoming one of the very few studios with start-2-end facilities to complete a film from scratch to big screen.

Please let us know if you need any further clarity on the use of funds.

Important to note the projected growth and increase in turnover as the business is growing,

Reason for two sets of accounts:

We specialise in two aspects of filming in the U.K. - Production and Line Production.

Production: It is where the Intellectual property is our own and we mount the whole project start to end till it's released in the cinemas or digital platforms like Netflix/Amazon.

Line Production: This is where we just execute the project on someone else's behalf as in studios like BBC, Disney etc.

The two accounts correspond broadly to the clients representing the separate nature of Production.
